

Seeking to add alternative investments to your traditional portfolios? Finding it difficult to find the appropriate hedge fund manager? Need a snapshot of your new portfolio mix? Ready to set up your fund of hedge funds but lack prior experience and expertise?

Setting up and managing a FOF is a complex task that requires a high level of competence and discipline. It is extremely important to apply a methodical portfolio construction process, which includes the investigation and selection of managers, and the structuring of an optimal portfolio capable of successfully integrating various funds and investment strategies. The prerequisites for a successful allocation include a thorough understanding of complex instruments, the different risk/return drivers in each strategy, extensive industry knowledge, and analytical ability.

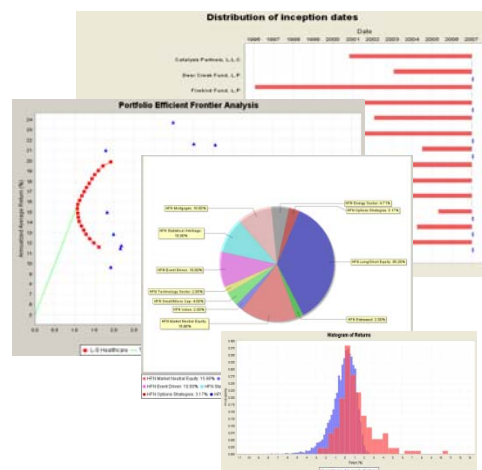

BERYL enables you to...

Integrate alternative investments with your existing traditional portfolio and expand your efficient frontier curve with Beryl know-how.

Understand fully the dynamic construction of your new FOF or portfolio mix.

Optimally combine different hedge funds and strategies to generate consistent absolute returns.

Instantly create pro-forma FOF portfolio according to your specific risk/return parameters and investment themes utilizing Beryl's quantitative models.

With Beryl's integrated FOF platform, we can quickly and efficiently execute the investment as well as operational aspects of a FOF setup, such as the Information Memorandum, selection of the Custodian and Administrator.

About Beryl

The Beryl Consulting Group LLC was formed in 2004 as a client and research-driven institutional boutique comprised of talented professionals whose intellectual capital and precise execution guide our excellence and competitive advantage. Beryl offers customization of fund of funds and due diligence research on hedge fund managers using Beryl's FOF platform. The platform gives us the edge to efficiently source hedge fund managers, provide unbiased qualitative and quantitative due diligence research across all strategies, geographies, asset classes and quickly build multi-strategy portfolios for our clientele.

Beryl has a proprietary fund "library" that consists of more than six hundred hand picked top performing managers; customized fund scoring models; risk measurement / monitoring (VAR, Fat-Tails Analytics, more than 100 statistics); portfolio construction tools (portfolio optimizers); accounting and online operational due diligence; in depth reports on funds and a Beryl Fund Rating system.
