

Are you an institutional investor that needs clean and crisp comprehensive Hedge Fund or FOF statistical reports? Is your marketing or investment team spending too much time preparing statistical fund reports? Need to create timely analytical reports for your investment committee meetings?

Beryl Statistical Reports are designed for both internal and external use as client reporting and marketing material. Beryl's powerful analytics engine leverages your data with calculations that provide insight into your existing and "pipeline" funds as well as your FOF portfolios.

BERYL enables you to...

Generate hundreds of complex return, risk and benchmark analytics including charts.

Customize single managed funds and FOF reports delivered in Adobe and Word formats.

Increase the overall productivity of your investment committee meetings by receiving uniform statistical fund reports expeditiously.

Maintain the privacy of your research i.e. fund names. We can create and label your hedge fund reports anonymously to retain complete confidentiality.

**General wisdom is that Excel based computation is prone to errors.
Beryl's analytical platform provides you with streamlined quality
reports on-demand in the most cost-effective and user-friendly way.**

About Beryl

The Beryl Consulting Group LLC was formed in 2004 as a client and research-driven institutional boutique comprised of talented professionals whose intellectual capital and precise execution guide our excellence and competitive advantage. Beryl offers customization of fund of hedge funds and due diligence research on hedge fund managers using Beryl's FOF platform. The platform gives us the edge to efficiently source hedge fund managers, provide unbiased qualitative and quantitative due diligence research across all strategies, geographies, asset classes and quickly build multi-strategy portfolios for our clientele.

Beryl has a proprietary fund "library" that consists of more than six hundred hand picked top performing managers; customized fund scoring models; risk measurement / monitoring (VAR, Fat-Tails Analytics, more than 100 statistics); portfolio construction tools (portfolio optimizers); accounting and online operational due diligence; in depth statistical reports on funds and a Beryl Fund Rating system.
